

```
//first -> side-effect function  
//second -> clean-up function  
//third -> comma separated dep list
```

```
useEffect(() => {  
  first  
  
  return () => {  
    second  
  }  
}, [third])
```

```
//variation:1  
//runs on every render  
useEffect(() => {  
  alert("I will run on each render")  
})
```

```
//variation: 2  
//that runs on only first render  
useEffect(() => {  
  
}, [])
```

```
//variation: 3
useEffect(() => {
  alert("I will run every time when
  count is updated")
}, [count])
```

```
//variation: 4
//multiple dependencies
useEffect(() => {
  alert("I will run every time when
  count is updated")
}, [count, total])
```

```
//variation: 5
//iss baar let's add a cleanup function
useEffect(() => {
  alert("Count is updated")
  return () => {
    alert("count is unmounted form UI");
  }
}, [count])
```

COUNT WALE MEIN YEH YAAD RAKHNA HAI KI
EVERYTIME COUNT IS UPDATED , IT IS
CONSIDERED AS RERENDER
