

```

8
9  function App() {
10     const [count, setCount] = useState(0)
11
12     function handleClick(){
13         setCount(count + 1);
14     }
15
16     function double(num){
17         for(var i = 0; i < 1000000000; i++){
18             return num * 2;
19         }
20     }
21     let input = 3
22     let num = useMmo(() => double(input), [input]);
23
24     return (
25         <>
26         <button onClick={handleclick}>
27             CLICK ME
28         </button>
29
30         <div>
31             {count}
32         </div>
33         <div>
34             {num}
35         </div>
36     </>
37 )
38 }

```

SIMPLE COUNT KA UPDATER LAGA HUA HAI ...
 JAB BHI COUNT UPDATE HOTA HAI ... TOH SAB
 KUCH RERENDER HOTA HAI ...

AB RERENDER KE DAURAN DOUBLE KA CODE
 BAAR BAAR CHALTA HAI ... JO KI EK STATIC CODE
 HAI ... INPUT VALUE IS NOT CHANGING ... IT IS
 STATIC....

BUT AT EVERY RE RENDER ... IT WASTES TIME
SO WE USE USEMEMO FOR IT WHICH STORES
THE VALUE FOR THAT STATIC PART ...

####3

IN USEMEMO....

ONLY ONE VALUE CAN BE STORED....

IF LETS SAY FOR 3 IS STORED AND THEN 4 IN
INPUTTED THEN ... VALUE OF 3 IS ERASED ...

ONLY VALUE OF 4 IS SUSTAINED.
