

JAVASCRIPT WAS DEFINED FOR FRONTEND BUT
NODE JS HELPS US USE JAVASCRIPT IN BACKEND
THAT IS SERVER SIDE TOO.

NOW WHEN WE HAVE FREEDOM OF USING
JAVASCRIPT IN BACKEND ...

TO EASE OUT THE JAVA CODING IN BACKEND
WE HAVE EXPRESS JS ...

IT IS A FRAMEWORK WHICH HELPS US WRITE
OUR CODE EASILY.... IT IS POSSIBLE TO WRIT
CODE WITHOUT EXPRESS BUT IT IS VERY
DIFFICULT AND NO ONE DOES THAT .
